Walnut Technologies

INSTRUMENT CLUSTER

WM-EAC 7" A

Features

- *7" Color TFT Display (800×480 resolution), centrally mounted*
- *Supports Digital, Analog, and CAN signal inputs*
- *Integrated Multitone Alert Speaker*
- *Plug-and-Play Connectors for Easy Integration*
- *Customizable Indicators – Up to 24 Alerts/Icons*
- *6 Capacitive Touch Buttons for User Interaction*
- *Auto Brightness Control (Day/Night Mode)*

Walnut Technologies

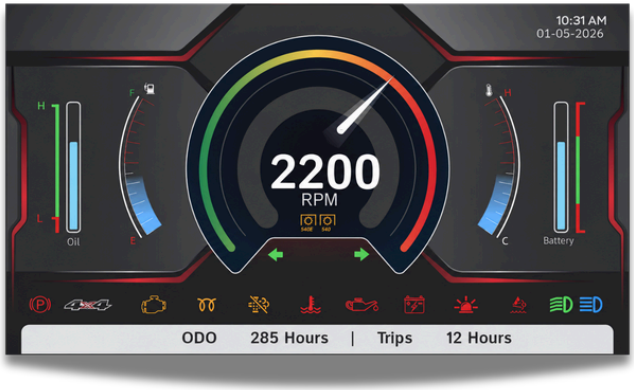

TECHNICAL SPECIFICATIONS	
Power supply	8.5 to 36V
Size(LxB)	279x205 mm
Display	7” TFT 800x480 pixels, Graphical View
Warning Indications	upto 24
Sealing degree	IP67
Vehicle Interface	CAN Interface
Connectors	Configurable Pin-Out (34 poles) Tyco AMP Super seal
Casing	Housing Material: PC-ABS (Polycarbonate + ABS blend); Viewing Window: Clear Polycarbonate
Electrical Interfaces	24x Digital Inputs, 6x analog inputs, 1x CAN Interface
Fixing	Metal Clamps with Screws

Walnut Technologies

Customised Dashboard View

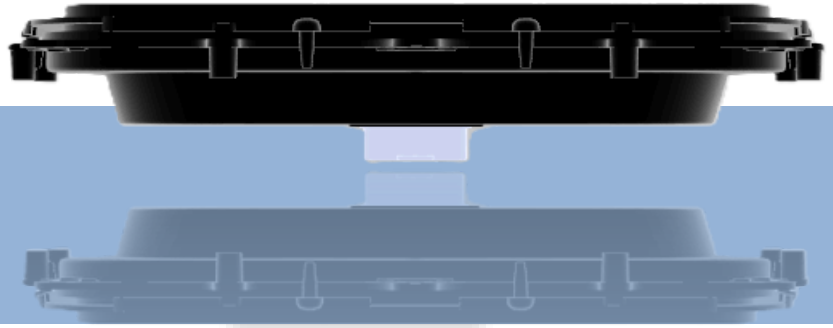

- *Advanced GUI Interface with modern graphics and personalized themes*
- *Predictive Maintenance Notifications reducing unexpected breakdowns*
- *Automatic Brightness Control for seamless day & night visibility.*
- *Engine Temperature Pre-Warning System for proactive protection.*
- *OTA based Software and dashboard upgrades for ease of upgrade.*

Walnut Technologies

ADDITIONAL INFORMATION	
Clock and Date	Battery Backed RTC
Screen brightness	Manual/Auto
Themes	Customised
UI	6 capacitive touch buttons for navigation
Visual Indication	Beam, Fuel low level, Water Temperature, Oil Pressure, Air Cleaner Clogging Sensor, Battery voltage, Engine RPM, Parking brake, PTO, Direction indication, Speedometer and optional
Additional Features	Day Light Sensor, Real Time Clock+Time, Integrated Speaker(customised audio), Hazard indication, Reset
Operating Temperature	-30 C to 85 C
Optional	Wi-Fi, 4G, 2G Connectivity

Walnut Technologies

Our Capabilities

Automotive Cluster Design & Manufacturing Capabilities

- R&D-Driven Innovation: In-house team for end-to-end product design, development, and validation.
- Integrated Manufacturing: 40,000 sq.ft. facility (expanding to 80,000 sq.ft.) with full-scale production capabilities.
- Advanced SMT Line: RS1 JUKI Japan – 100,000 CPH for high-speed, precision assembly.
- In-House Testing & Calibration: Using Keysight, NI, Rigol, and Tektronix equipment.
- PCB Expertise: Complete in-house design, prototyping, and production.
- Quality Control: Dedicated IQC, LQC, and OQC departments ensuring best-in-class quality.
- Tooling & Molding: In-house mold design and plastic injection molding for high-precision components
